### SUMMARY

Software Engineering graduate (Dean's List, CGPA 3.53) with practical experience in full-stack development, digital content creation, event coordination, and data management. Eager to contribute strong technical and creative skills in a dynamic work environment.

### WORK EXPERIENCE

**Digital Marketing Intern, Sarawak Skills, Kuching**

Feb 2024 - Aug 2024

- Assisted in creating digital content and visuals for social media promotions and outreach campaigns.
- Supported event management activities alongside the supervisor, including planning, coordination, and on-site execution.
- Helped instruct and facilitate training sessions and programs, working closely with the lead instructor.
- Contributed to the organization and management of program data, ensuring accurate record-keeping and reporting.

### PROJECTS

**PetStay – Online Pet Boarding Booking System**

Oct 2024 - July 2025

- Built a full-stack system using React.js, Node.js, Express, and MySQL.
- Included user/admin login, Google OAuth, image/PDF upload for payment proof, cart, feedback, and admin dashboard.
- Designed to support responsive UI and secure data flow.

**The Gohez Web Application – Online Clothing Platform**

Oct 2023 - Jan 2024

- Contributed to designing and developing an online clothing web application using C++, CSS, JavaScript, HTML, PHP, and MySQL.
- Implemented features such as user profiles, product catalogue management, and a secure payment system.

**ABM Library – Online Book Rental Website**

Oct 2022 - Jan 2023

- Contributed to the frontend and backend using C++, JavaScript, PHP, and MySQL.
- Implemented book catalogue management and user authentication.
